CONTINUOUS LINER SYSTEM

ADVANTAGES

- Protection for operators & facility
- Equipment in compliance to ATEX & NFPA
- Contained system for handling harmful waste dust

Application	Continuous liner systems are typically used on chemical or pharmaceutical applications.
Installation Options	 The continuous liner system is available for the following dust collectors: Gold Series Camtain, Gold Series High Vacuum, Gold Series X-Flo, Quad Pulse Package Series. The system is usually used together with the Camfil Dual Valve system.
Comment	We supply equipment which is compliant according to regional regulation such as ATEX or NFPA.
